

14.11.2020

Today, it is the first day for the two months class training sessions of Youth Entrepreneurship Support II program via an online platform after almost three months of efforts on content development for the program, advertising posts in the cities and recruiting processes. This program provides technical knowledge and entrepreneurship skills to 60 young graduate students including 7 women from different engineering disciplines. in Kabul and provinces. These graduates will benefit with leadership trainings and coaching and will be empowered with entrepreneurship skills in Renewable Energy and Energy Efficiency at the end of the program. This program also helps strengthening the relationship of students with private and governmental actors in the field of renewable energies and energy efficiency in Afghanistan. The Afghan-German Cooperation "Energy Sector Improvement Program" (ESIP) organized and supported the event.
