

What we get in is 50%
Dependent on the weather

At Cloudy Time We Get Less Sun Fuel Energy & Less Out Put
Electric Energy Keep The Balance & Use Less Electric Energy
At This Time

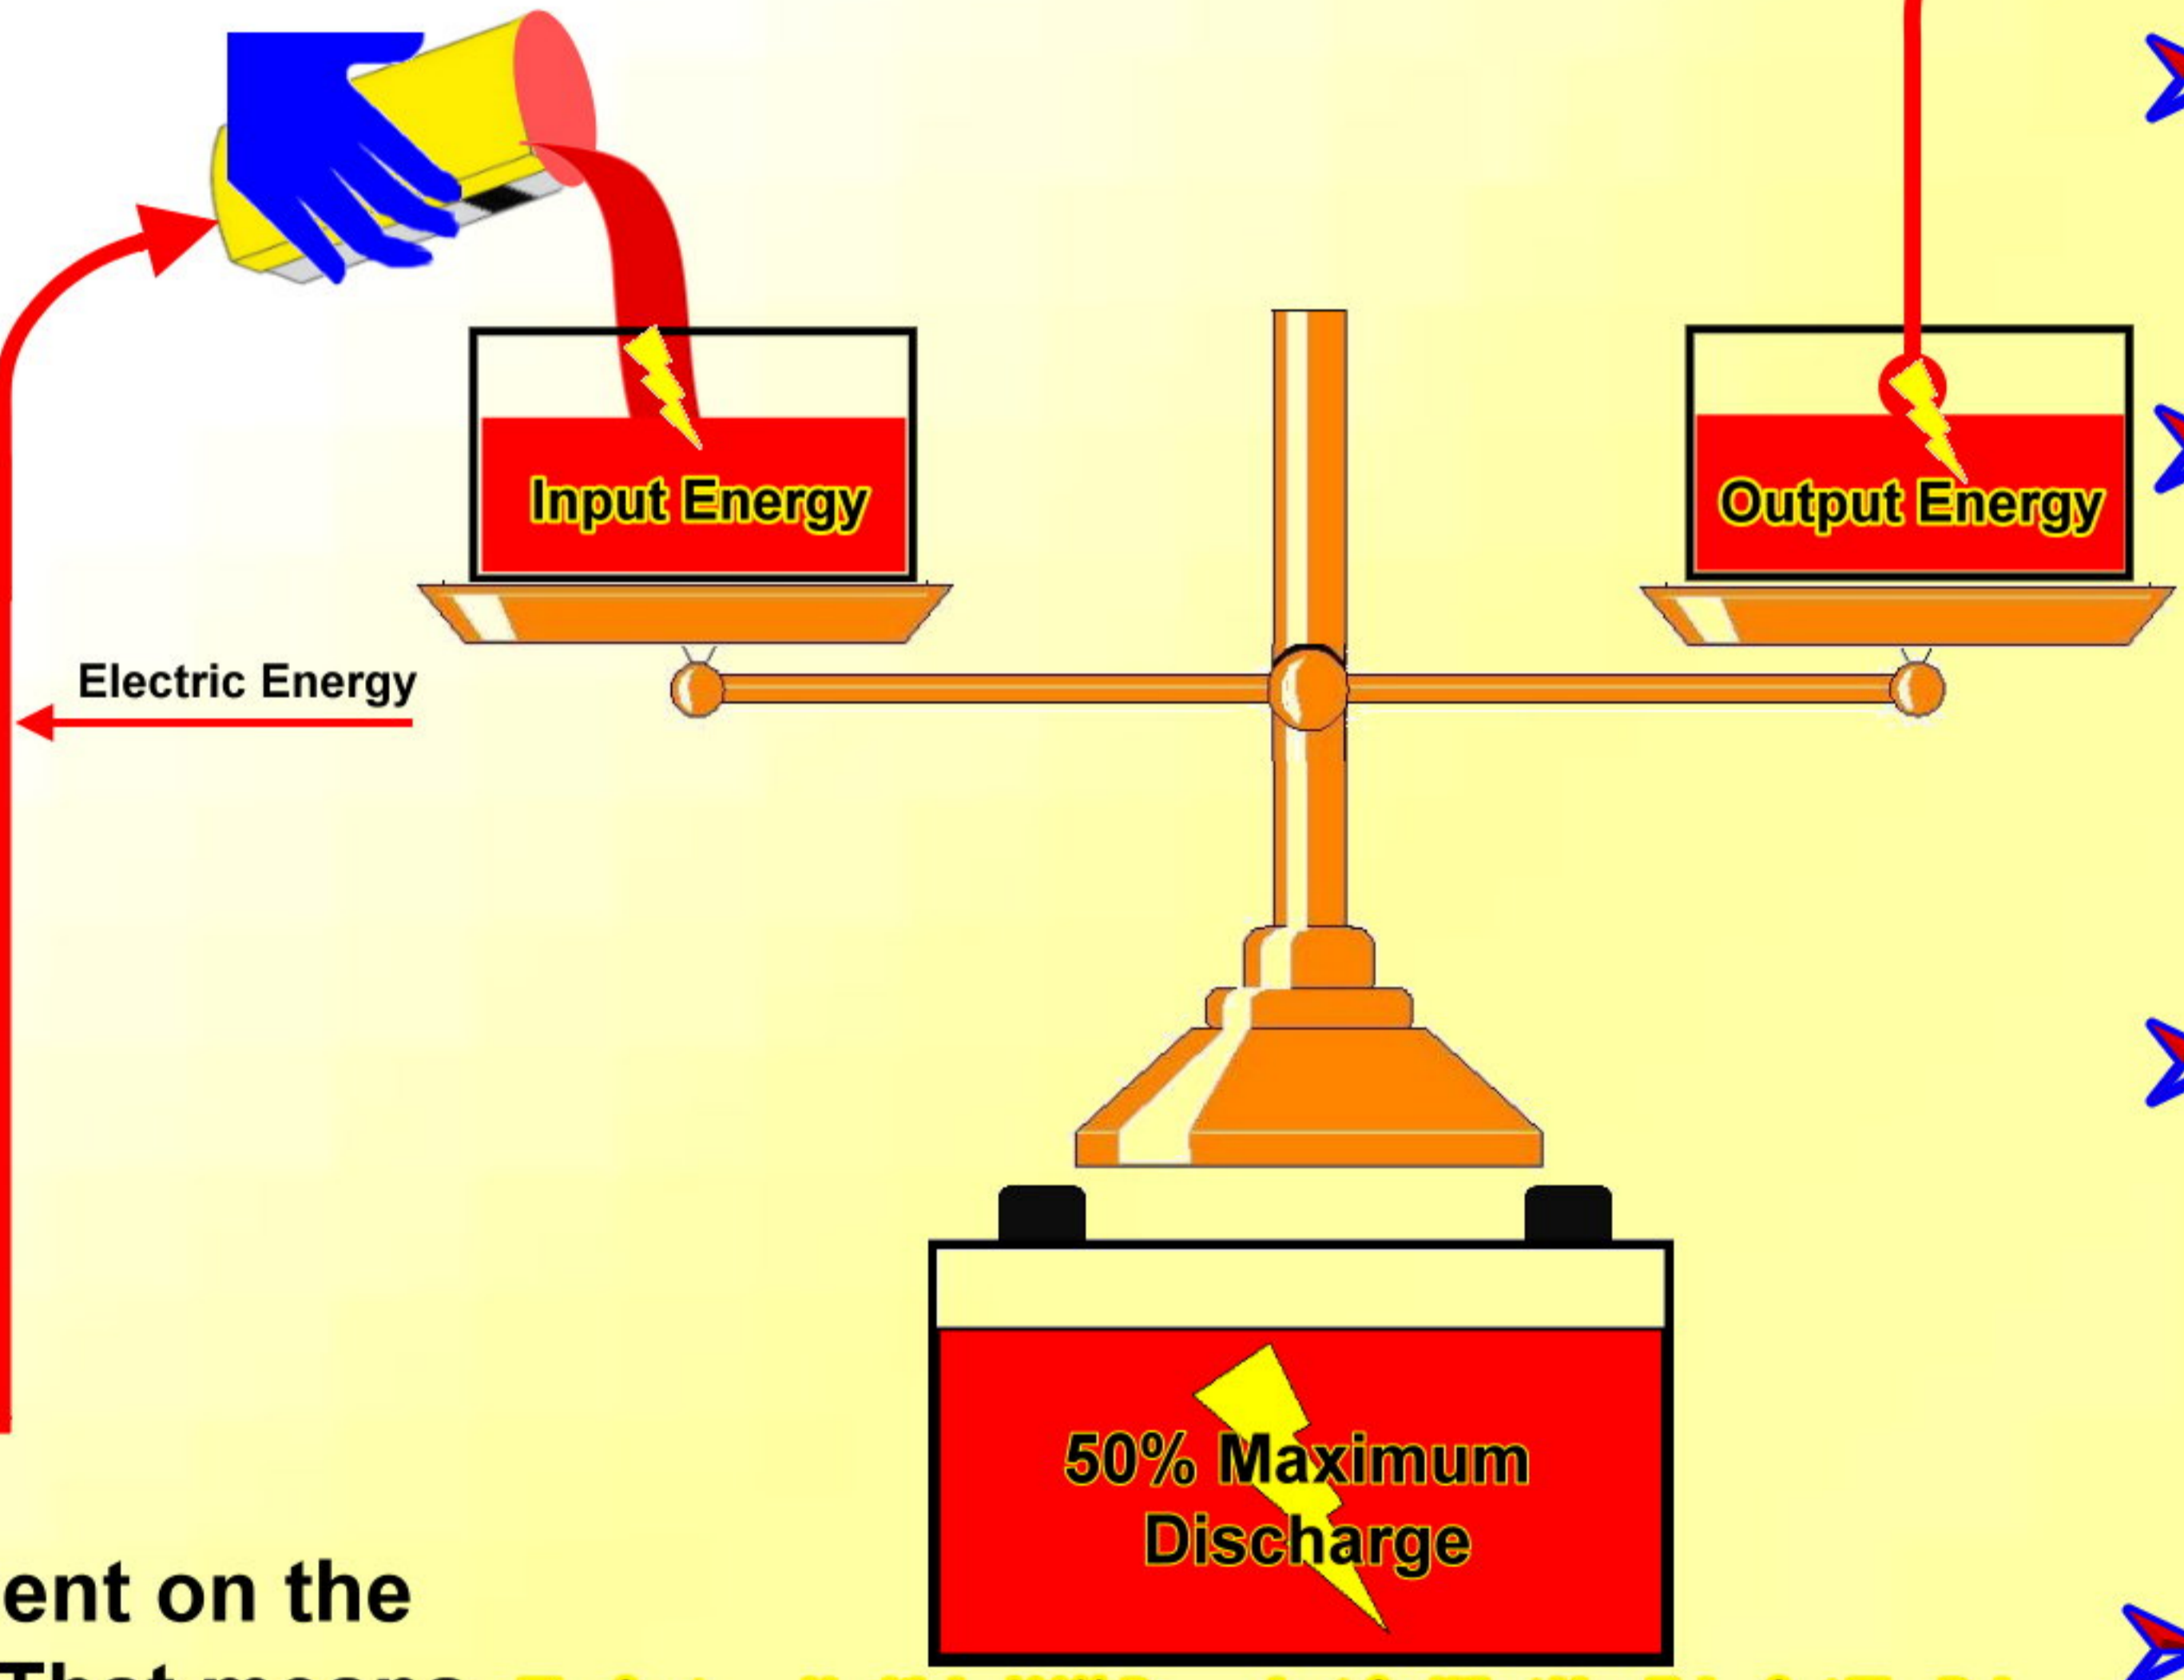

So That At Cloudy Time We Must Keep Our Energy Balance!!!
That means:-
On This Days When We Use More Than as We Get Sun
Energy, it Damaging The Energy Bank /Battery/ So It Must
Be Use a few Energy For Limited Time, To Keep The
Energy Balance!

Don't Take More Energy Out As You Get in From The Sun!
Keep The Energy Balance!!!

Economize
the
Consumption
by

SunLight Is Fuel For PV
Solar Generator

Switch off Light
When you Leave
a Room

Economize Usage
of Appliance When
The Day is Cloudy

Unplugged Your
Appliance When
it isn't in Use

- Uses Refridgerator
Only When Necessary
- After Using
Refridgerator Close
The Door Properly

Do's & Don'ts

Clean The Solar Panel

Unused Lights Turn Off
& unplugged the Unused
Appliances

Cut The Grass Every Time

Don't Touch The Electric
Polarity & Wires

Nothing To live On the
Solar Panels

Never to Use the High
Consumptive Appliances

What we get in is 50% Dependent on the
maximum input by the Users! That means

The Systems Health Is 100% Dependent On What You Take Out The Balance

- Clean Every Time the PV Solar Electric Generator Area
- Clean the Dust & Other Things On The PV Solar Panels Once in a Week
- Shading Free the PV Solar Panels Area
- Cut Grass Under & around PV Solar Panels Area & Take Care For Cables and Wires
