

SACREEE

COOPERATION PITCH

23rd January 2018

SACREEE

SADC CENTRE FOR RENEWABLE ENERGY & ENERGY EFFICIENCY

SACREEE was established in 2015 by the Southern African Development Community (SADC) Energy Ministers and endorsed by 35th SADC Council of Ministers Meeting -Decision 61 with a mandate to promote

- ❖ **increased access to modern energy services**
- ❖ **improved energy security across the SADC Region**

SACREEE coordinates the efforts and interventions in the Renewable Energy (RE) and Energy Efficiency (EE) sectors by various actors from governments, private sector to civil society organisations within SADC. In particular, SACREEE works to provide a platform for addressing market barriers that inhibit wide-scale deployment of RE and EE technologies and services in SADC member states.

SACREEE is established on a sustainable basis through Member States contributions, Donor funding and cost recovery from services offered to projects.

SACREEE Secretariat is based in Windhoek, Namibia

Partnerships are key! The SACREEE core supporters
