# TRANSFORMING ENERGY ACCESS: SCALING SOCIAL ENTREPRENEURS OF RENEWABLE ENERGY MINI-GRIDS

DIPTI VAGHELA

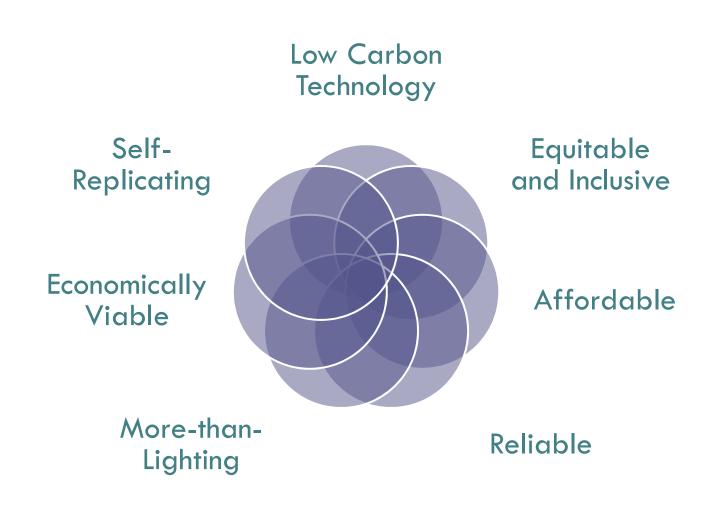

HYDRO EMPOWERMENT NETWORK (HPNET)

LOW CARBON ENERGY FOR DEVELOPMENT NETWORK (LCEDN) 7<sup>TH</sup> ANNUAL CONFERENCE MAY 30, 2018

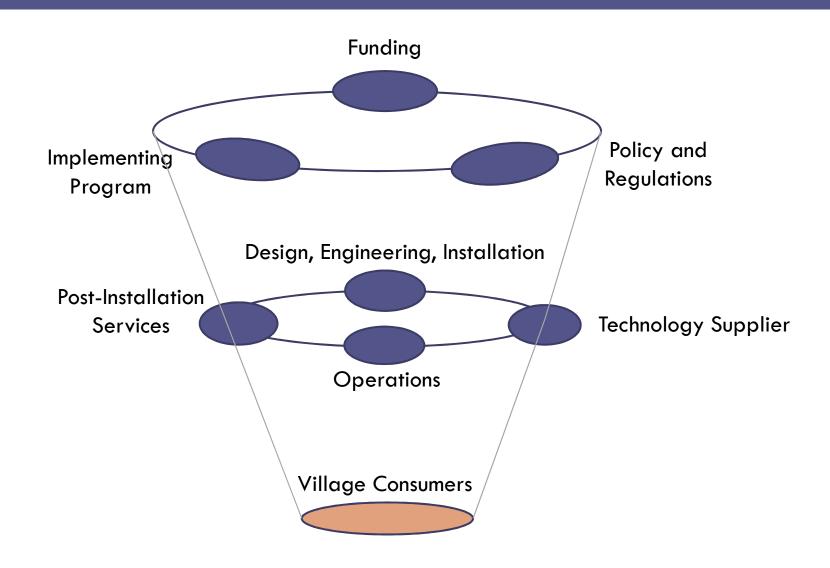

#### Overview

- □ Transforming Energy Access
  - Desired Characteristics
- □ Typical Energy Access Programs
  - Components
- Social Entrepreneurs
  - Defining Characteristics, Roles, Types
- Empowering Social Entrepreneurs
  - Cases: South Asia
  - Cases: Southeast Asia

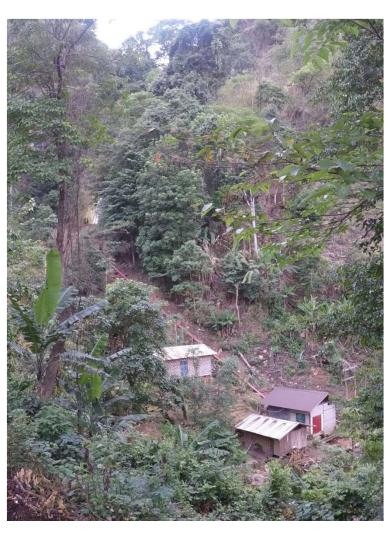

#### Solutions for Transforming Energy Access Desired Characteristics

# Energy Access Programs Typical Components

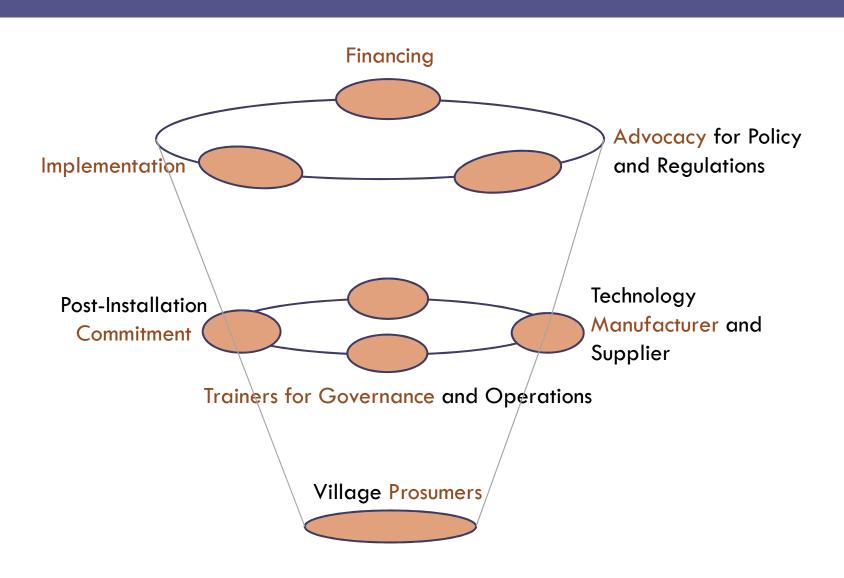

# Social Entrepreneurs of Energy Access Defining Characteristics

- Able to overcome physically extreme conditions
- Have in-depth andexperience-based knowledge
- □ Engage in long-termpartnership with communities
- Prioritize local impact over high profit
- Economically viable solutions

#### Social Entrepreneurs of Energy Access Multi-faceted Roles

# Social Entrepreneurs of Energy Access Main Types

Туре	Typical Traits	Advantages	Limitations
Small Non-Profit	Depend on grants Small team 1-project at a time	Strong focus on inclusion Refined community processes	Low economic viability Limited technical skills Funds difficult to raise
Large Non-Profit	Depend on grants Parallel projects	Funds easy to raise High visibility	Heavy donor-influence "white elephant' projects
Local For-Profit	Family-based 1-project at a time Proven technology	Multi-generation experience Robust local actor networks Low cost + reliable	High economic viability Weak English Low visibility Market-based approach
Foreign For-Profit	Ambitious targets No track record	Well-funded Strong marketing resources	Require high margins Limited access to locals
Local Cooperative	Partners with technology provider	Villagers as producers Strong local governance Financial accountability!	High economic viability Market-based approach Low visibility

### Social Entrepreneurs of Energy Access HPNET Contexts

# Scaling Social Entrepreneurs Pakistan, Large Non-Profit: AKRSP/SRSP

- Connect local practitioners to each other
  - Those trained at HYCOM
- □ Project-to-project interconnection
  - Learn from Nepal and support Nepal's technology gap

### Scaling Social Entrepreneurs India, Large Non-Profit: Gram Vikas

- Projectrehabilitation
  - Funds
  - Human resources
- Strengthening local service providers
- Economic viability
- Learn with other developers in India

# Scaling Social Entrepreneurs Myanmar, Local For-Profits: HyCEM

- Access to local bank financing
- Regulations for grid interconnection
- □ Technology upgrade
- Increased visibility

# How to Empower Social Entrepreneurs Indonesia, Local For-Profits: AHB

- Access to bank financing
- Utilize training center HyCOM
- Sustainability of skilled suppliers

### Scaling Social Entrepreneurs Philippines, Small Non-Profit: YAMOG

#### **High Priorities**

- Local fabrication
- Technology transfer training center
- □ Economic viability
- □ Increased visibility

# Scaling Social Entrepreneurs Hydro Empowerment Network (HPNET)

#### INTERNATIONAL MULTI-STAKEHOLDERS DEVELOPMENT DONORS, POLICY CONSULTANTS, RESEARCHERS

- WEBINARS: MHP PROs CONs, GRID INTERCONNECTION, PRODUCTIVE END USE
- INCLUSION OF LOCAL PRACTITIONERS IN DONOR-GOVERNMENT DIALOGUE
- ACTION RESEARCH FOR POLICY CHANGE

#### IN-COUNTRY MULTI-STAKEHOLDERS CIVIL SOCIETY, FINANCIERS, GOVERNMENT

- PRACTICE-TO-POLICY EVENTS: MHP IN MYANMAR, GRID INTERCONNECTION
- PARTNERSHIPS TO ENABLE ACCESS TO FINANCING

#### LOCAL IMPLEMENTING ORGANIZATIONS ASSOCIATIONS, NGOs, GOVERNMENT, PRIVATE SECTOR

- TECHNICAL TRAININGS: PICO HYDRO, LOAD CONTROLLERS, MULTI-MEDIA
- STRENGTHENING LOCAL ASSOCIATIONS AND TRAINING CENTERS

RURAL COMMUNITIES WITH < 1 MW HYDROPOWER
