

"Off-Grid Power Forum"

INTERSOLAR EUROPE 2015

Off-grid power will have an extraordinary industry forum at the **Intersolar Europe Trade Fair, June 10th and 12th 2015** in Munich. The German Solar Industry Association (BSW-Solar) together with its partners presents the **Off-Grid Power Forum** at the BSW-Solar booth in Hall B1.

BSW-Solar invites international delegations to visit the Off-Grid Power Forum. The forum will inform about solutions and case studies for off-grid applications and brings you in contact with companies active in the field. The "Off-Grid Power Forum" consists of a **special exhibition** and a three days **presentation program**.

Special Exhibition

At the special exhibition, exhibiting **companies** will display their products and technical solutions in the Off-Grid Power sector on board walls under the roof of the BSW-solar tradeshow booth. This year's exhibitors are Sunna Design, SOLAR23, Studer Innotec, develoPPP.de, Product Health and Energypedia

Special exhibition and presentations program

Presentation Program

The three days presentation program runs in parallel to the special exhibition, also at the BSW-Solar booth. It features different **solar off-grid applications segments**. **Companies** will present their case studies and technical solutions.

Representatives from international delegations will present the off-grid market potential and needs in their countries with reference to the application segment. This years speaker include Alternative Energy Development Board AEDB / Pakistan, BAE Batterien GmbH, develoPPP.de, GIZ - Deutsche Gesellschaft für Internationale Zusammenarbeit GmbH, IBC Solar AG, Infinergia consulting LLC, IRENA International Renewable Energy Agency, Juwi International, Phaesun GmbH, Product Health Ltd, Qinous GmbH, Rahimafrooz Renewable Energy Ltd, Reiner Lemoine Institut gGmbH, SMA Solar Technology AG, Solar 23 GmbH, SunEdison, Sunna Design SA, Studer Innotec SA, Trojan Battery Company

The preliminary structure for 2015 is as follows (and subject to change)

	June 10	June 11	June 12
10:00		Water desalination & treatment with solar	Island systems with Solar. PV for Islands and Mines
		Rural goes solar II: village electrification and cooling	Secure energy supply for tourism and hospitals: a solar case
	<i>Opening Reception</i>	<i>Lunch Break</i>	<i>Innovation Prize</i>
14:00	PV-hybrid Mini-Grids	Storage solutions for the solar age	
	Rural goes solar I: Irrigation	Solar power for mobile communication and street lights	
	<i>Off-Grid Reception</i>		

The "Off-Grid Power Forum" is part of the joint **OFF-GRID PLATFORM**, BSW-Solar presents together with the Alliance for Rural Electrification (ARE), the Intersolar Europe and the Ostbayerisches Technologie-Transfer-Institut e.V. (OTTI).

Should you be interested in **visiting** the Off-Grid Power Forum please contact

About Intersolar Europe

Intersolar Europe takes place annually at Messe München. It is the world's leading exhibition for the solar industry and its partners. In 2014, 1,082 international exhibitors and 42,380 trade visitors attended Intersolar Europe. The exhibition focuses on the areas of photovoltaics, PV production technologies, energy storage and renewable heating. Since its founding, it has become the most important industry platform for manufacturers, suppliers, distributors, service providers and partners of the solar industry. The accompanying Intersolar Europe Conference consolidates the topics of the exhibition. In 2014, more than 1,100 attendees and around 200 speakers discussed current industry topics and shed light on the background of technological, market and political developments.

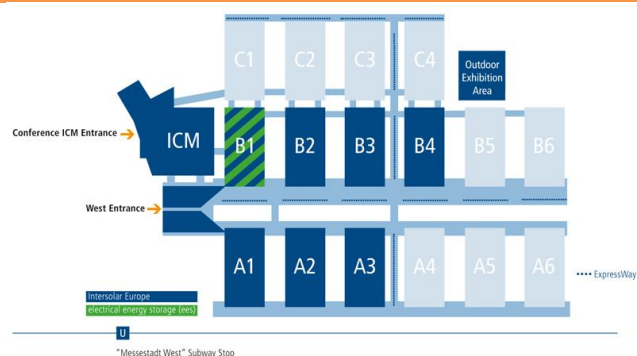

In 2015, the ees Europe, international exhibition for batteries, energy storage systems and innovative production takes place for the second time in conjunction with Intersolar Europe. The ees Europe is covering the entire value chain of innovative battery and energy storage technologies.
