

About Energypedia

Our Vision

Energypedia's vision is a world of free knowledge exchange and mutual learning about renewable energy technologies in which every person has access to modern and sustainable energy services. Access to sustainable and reliable energy services is fundamental in encouraging environmental, social and economic development. Energypedia is strengthening global knowledge sharing on renewable energy and efficiency to expand the use of renewable energy in developing countries.

Our Mission

Energypedia's mission is to become a living platform on renewable energy and efficiency in the development sector by offering free, relevant and high-quality information and user-friendly tools to enable stakeholders engaged in the energy sector to collaborate, create and share their practical experiences.

Our History

The online platform www.energypedia.info was launched in 2010. In April 2012, the non-profit corporation "energypedia UG (haftungsbeschränkt)" was formed and took over operations from the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH. Energypedia hosts hundreds of articles on renewable energy technologies and energy efficiency in developing countries. Energypedia connects energy experts in a global knowledge network with every fifth registered energypedia user coming from Africa and every seventh from Asia. Monthly, thousands of visitors are reading www.energypedia.info.
