Overview of Interventions by Energy Solutions for Displacement Settings in Uganda

Photo Credit: Malaika/GIZ

Implemented by:

In cooperation with:

PROJECT

Energy Solutions for Displacement Settings (SUN-ESDS) is a component of the Global Programme Support to UNHCR in facilitating the operationalisation of the Global Compact on Refugees in the Humanitarian-Development-Peace Nexus (SUN), which is commissioned by the German Federal Ministry for Economic Cooperation and Development (BMZ) and implemented by Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ).

- Access to electricity by promoting mini-grids in refugee settlements _____ 19
- Support to Productive Users of Energy in mini-grid locations _____ 20

DEVELOPMENT OF THE SUSTAINABLE ENERGY RESPONSE PLAN FOR REFUGEES AND HOST COMMUNITIES (SERP)

SERP CONSULTATIONS

To gather valuable inputs for the SERP, consultations with various stakeholders were held across 12 refugee-hosting districts from November 2020 to March 2021.

Photo credit: Paul Quigly, Consultant Integration

SERP DEVELOPMENT

A reiterative process of providing a full SERP draft for discussion and revision. The SERP was endorsed by the CRRF Steering Group in December 2021. Lessons Learned on the SERP development can be found [here](#).

Photo credit: Malaika/GIZ

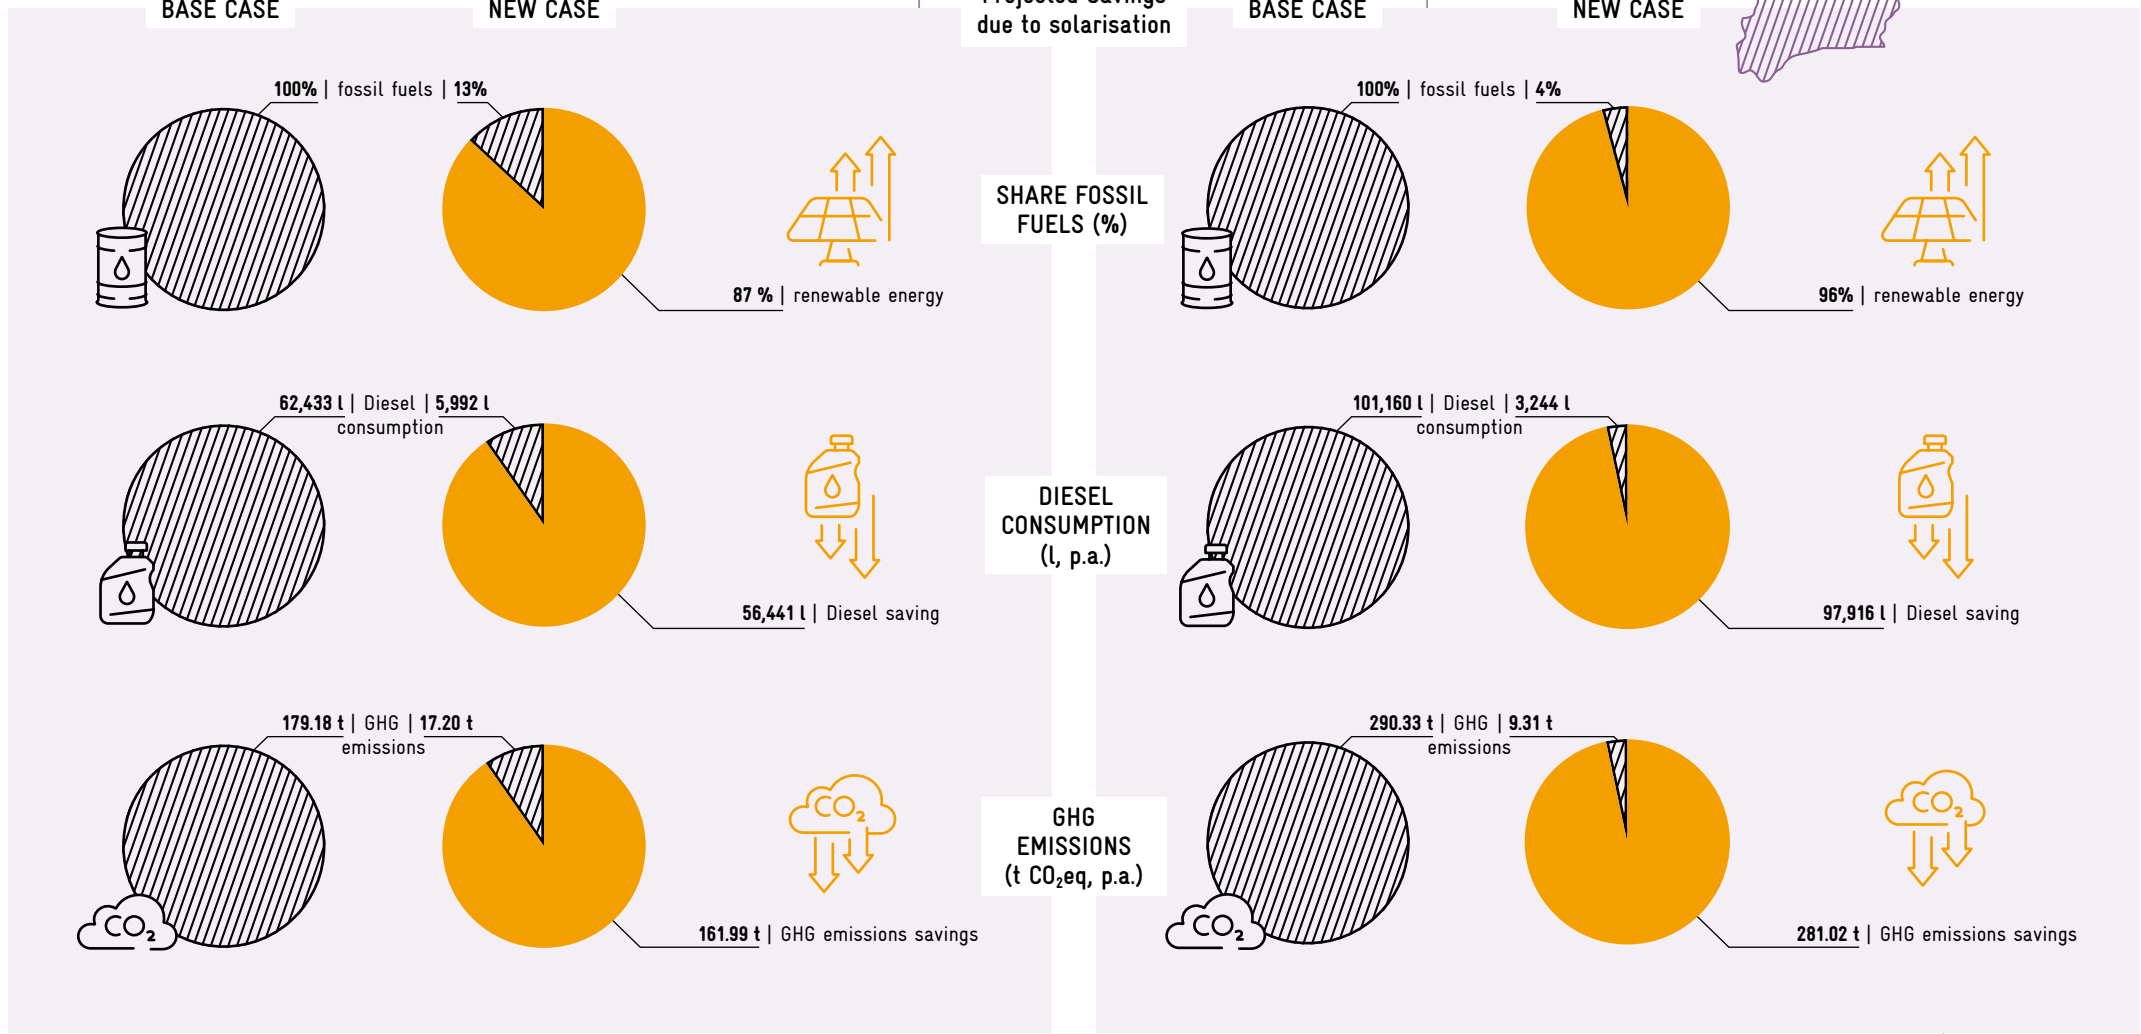

SERP LAUNCH

Publication, dissemination, and advocacy of the SERP and the official launch event on the 25th of August 2022.

GREENING UNHCR INFRASTRUCTURE

SUPPORTING UNHCR IN SOLARISING COMPOUNDS IN ADJUMANI AND YUMBE DISTRICT

ESDS supported the feasibility studies, business case development, development of procurement documentation, regulatory analyses, and environmental and social impact assessments.

MARKET-BASED ENERGY ACCESS FOR HOUSEHOLDS, SOCIAL INSTITUTIONS, AND PRODUCTIVE USERS OF ENERGY

IMPROVED INSTITUTIONAL COOKSTOVES (IICS) FOR SOCIAL INSTITUTIONS

SUPPORT TO PRIVATE SECTOR THROUGH RESULTS-BASED FINANCING (RBF) MECHANISMS

RHINO CAMP, IMVEPI, BIDIBIDI, OMUGO, LOBULE, PALORINYA AND KIRYANDONGO REFUGEE SETTLEMENTS AND RESPECTIVE HOST COMMUNITIES

SOLAR COMPANIES SUPPORTED

D.light, SolarAid, Village Power, Fenix International (Engie), Fena Solar

Between May 2021 and January 2024

2,100 quality solar products (solar home systems, charging and lighting solar lanterns) were sold to refugee and host households (HHs).

The RBF approach aimed to develop markets for sustainable access to quality solar products by strengthening supply chains in these non-commercially viable markets that are perceived to be risky by private sector solar companies. Solar companies were supported to develop and strengthen their delivery and access channels within the refugee and host markets with different results-based incentives, including gender incentives that particularly targeted involvement of women in the distribution chain as well as access.

Supply side RBF was the major delivery mechanism, however, blended RBF targeting both supply and demand (end users) was piloted in Rhino Camp, Imvepi, and Bidibidi Refugee Settlements.

Photo credit: Malaika/GIZ

RHINO CAMP, IMVEPI, BIDIBIDI, OMUGO, LOBULE, PALORINYA AND KIRYANDONGO REFUGEE SETTLEMENTS AND RESPECTIVE HOST COMMUNITIES

COOKSTOVE COMPANIES SUPPORTED

- BM Energy Saving Equipment Limited
- International Lifeline Fund
- Raising Gabbho Foundation
- Clean Environment For Africa (CEFA)

Between October 2020 and September 2023

11,500 quality improved cookstove products were sold to refugee and host households.

The RBF approach aimed to develop markets for sustainable access to quality improved cookstove products by strengthening supply chains in these non-commercially viable markets that are perceived to be risky by private sector solar companies. Through RBF support, the above cookstove companies were supported to develop and strengthen their delivery and access channels within the refugee and host markets with different incentives including gender incentives that particularly targeted involvement of women in the distribution chain as well as access.

Supply side RBF was the major delivery mechanism, however, blended RBF targeting both supply and demand (end users) was piloted in some settlements of Rhino Camp, Imvepi and Bidibidi.

ACCESS TO ELECTRICITY BY PROMOTING MINI-GRIDS IN REFUGEE SETTLEMENTS

JERUSALEM TRADING CENTRE MINI-GRID

Photo credit: NOA Uganda

In cooperation with the GIZ Uganda Pro Mini Grids Project, Ministry of Energy and Mineral Development and GIZ pioneered the development of solar-powered mini-grids in 28 villages in Lamwo District. ESDS and GET.transform made financial contributions to this project for the installation of two mini-grids in Palabek Refugee Settlement and one mini-grid in a host community.

SUPPORT TO PRODUCTIVE USERS OF ENERGY IN MINI-GRID LOCATIONS

BUSINESS TRAINING OF PRODUCTIVE USERS OF ELECTRICITY

AVSI Foundation was selected by ESDS to provide support to productive users of electricity in Lamwo District. After a business ideas competition among micro and small businesses located within the mini-grid locations, 103 female and

male refugee and host community business owners were trained in business and financial skills. Of these approximately 80 are considered for a matching grant to support their purchase of electric appliances and equipment.

Photo credit: AVSI Foundation

Activities carried out between 2022 and 2024

80 Beneficiaries from the matching grant scheme

50 Refugees (30M|20F)

30 Hosts (22M|8F)
