

About energypedia

Who we are

Energypedia is a non-profit organization who runs the online platform www.energypedia.info for collaborative knowledge exchange on renewable energy, energy access and energy efficiency in developing countries. We offer free access to expert information. Any registered user can easily create, modify and share content.

As of Januar 2020, www.energypedia.info includes over 4,500 freely usable articles, which have been contributed by a growing community of more than 10,000 registered energy experts. Our users comprise energy practitioners, experts, academics and other interested stakeholders from all over the world. We belief that knowledge sharing is power!

Our history

The online platform www.energypedia.info was launched in 2010 within the Energising Development (EnDev) program, implemented by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH. In April 2012, the independent, non-profit energypedia UG (haftungsbeschränkt) took over operations. Since then, www.energypedia.info grew into the one-stop information point with over one million page views per year.

Our vision

A world where everyone has access to sustainable energy services.

Our mission

Our mission is to empower energy practitioners by fostering free knowledge exchange, global collaboration and mutual learning on renewable energy, energy efficiency and energy access. Energypedia provides an online platform to collect and disseminate free, relevant and high quality information. Our user friendly tool allow experts to write about and share their experiences.
