# **WB Support Program to NEA for Environmental and Social Management**

---

Kick off workshop

# Project Activities

AIM: Strengthen NEA's institutional capacity in E&S management:

---

## Participatory Institutional assessment of the NEA

Work with NEA team to undertake a participatory institutional assessment of NEA's approach to and capacity for environmental and social management. The review will map out the existing NEA's policy and regulatory system, applicable MoEWRI policy and regulatory system, the institutional structure of NEA, and NEA's human capacity to manage risks and impacts etc. Aim of review is to help develop plan for short to medium capacity support program and longer term reform recommendations.

## Support for capacity development for ESSD and other relevant NEA staff

This component aims to support the NEA in developing and delivering an ongoing capacity building plan and program for NEA staff; it is envisaged that the capacity development program will continue through the life of the grant in line with the other activities

# Project Activities

---

## Environmental and social policy and guideline development:

The component will support the NEA in the development of an overarching policy and guidelines to guide the approach to and management of environment and social risks and impacts in NEA's energy projects.

## Support design of effective centralized GRM system in NEA:

This component will provide support for the design of an effective, centralized Grievance Redress Mechanism (GRM), for use across all NEA energy projects, in both Bank and non-Bank supported projects.
